DANIEL CLEMENTRICH HOUSTON

+65 8312 8712 | danielclementrich09@gmail.com | https://www.linkedin.com/in/daniel-clementrich-houston/ | https://melloww-png.github.io/

Analytical and detail-oriented, I bring practical cybersecurity skills, clear communication and a methodical approach to solving problems, with a career focus on SOC analysis and cloud security.

EDUCATION

Coventry University, PSB Academy — Singapore Jan 2026 – Mar 2027
Bachelor of Cyber Security
Relevant coursework: Secure Programming, Cryptography and Computer Forensics.
PSB Academy — Singapore Apr 2024 – Dec 2025
Diploma in Cyber Security
Relevant coursework: Network Defence, Security Specialist, Computer and Operating Systems.

PROJECTS

SOC/SIEM Dashboard Simulator (Home Project) 2026
Python | Flask | SQLite | Security Monitoring | Detection Logic
- Built a lightweight dashboard to monitor simulated security events and review alerts.
- Implemented detection logic to group matching events within a defined time window.
- Tested detection boundaries and event retention to verify alert accuracy and evidence handling.

Firewall Simulator (Home Project) 2026
Python | SQLite | Networking | Packet Filtering
- Built a firewall simulator that evaluates source IP, port and protocol against prioritised rules to allow or block simulated packets.
- Added IPv4 validation and SQLite logging to record filtering decisions for traffic review.
- Tested filtering with valid, invalid and unauthorised traffic scenarios.

OWASP Juice Shop Security Assessment (Secure Programming Coursework) 2026
Burp Suite | Browser Developer Tools | Kali Linux | Web Application Security
- Assessed OWASP Juice Shop in a local Kali Linux lab, identifying SQL injection, XSS and authentication weaknesses.
- Used Burp Suite to test CAPTCHA reuse and input validation; documented evidence, impact and recommended fixes.

Secure Mail Cryptography System (Cryptography Coursework) 2026
Python | AES-256-CBC | RSA-2048 | SHA-256 | HMAC | RSA-PSS
- Developed a secure email system using AES-256-CBC message encryption and RSA-2048 key exchange.
- Implemented SHA-256 and HMAC integrity checks, with RSA-PSS digital signatures for sender verification.
- Tested encryption, decryption, integrity checks and tampered-message scenarios.

EXPERIENCE

KungFu Live Seafood — Jakarta, Indonesia Nov 2023 – Apr 2024
Accounting Assistant
- Maintained Excel records for financial transactions and inventory management.
- Expanded the product range, contributing to a 10% increase in monthly revenue.

SKILLS & CERTIFICATE

Technical skills: Use Python, Java, SQL and SQLite for programming and databases, with practical knowledge of Linux, Wireshark, Burp Suite, Nmap and Microsoft Azure.
Soft skills: Apply problem-solving, attention to detail and clear communication in technical projects, critical thinking adaptability and communication.
Certificate: TryHackMe SAL1 exam preparation; SOC Level 1 study path in progress.

ADDITIONAL

Languages: English (fluent), Indonesian (native), Chinese (conversational).
Status: Singapore Student Pass
